3 Port Mechanical Valve Large Push Button Type for Control Stand VM130-01-30*A-X31 / X41 / X237A

SMC CORPORATION
4-14-1, SOTO-KANDA,
CHIYODA-KU,
TOKYO 101-0021, JAPAN
URL <http://www.smcworld.com>

■ Features: The outside diameter of the push button expanded.

X31: With ring guard

- Unintentional use prevented.

The button cannot be pushed by mistake.
(The button is pushed with a finger tip.)

X41: With ring guard and contamination eliminating hole

- Unintentional use prevented.

The button cannot be pushed by mistake.
(The button is pushed with a finger tip.)

- A hole to eliminate foreign matter added.
Air blowing can be applied to the hole, eliminating foreign matter and dust.
Also, the large clearance between the ring guard and push button helps prevent entry of foreign matter and dust as well.

X237A: Extra-large push button

The button can be pushed with a palm, which reduces fatigue.

However, since it is possible that the button is pushed unintentionally, be sure to use in combination with the two hand control valve (VR51).
