## ⚠ Caution

### Light/Surge Voltage Suppressor

#### AC, 100 V or more

#### 48 VDC or less

### Electrical Connection

In the case of DIN terminal (with light/surge voltage suppressor), the connection is as follows. Connect each to the power supply side.

### How to Change Passage State

When changing the passage state, confirm that pressure has been removed from the valve.

Unscrew the M4 x 0.7 hexagon socket head cap screw in the changeover plate and match the ◀ mark on the adapter plate with the character on the changeover plate. Piping is as follows.

### Mounting Screw Tightening Torques

M4: 1.4 N·m

### Piping

Passage	Port	P	A	R
N.C.		Inlet	Outlet	Exhaust side (Plug, in case of 2 port valve)
N.O.		Exhaust side (Plug, in case of 2 port valve)	Outlet	Inlet
External		Universal porting (Piping of inlet pressure side is possible anywhere)		

Note 1) In the case of internal pilot, confirm that a plug is inserted to X port. If not, insert a R 1/8 plug.

Note 2) In the case of external pilot, supply air pressure from X port.

Confirm the safety sufficiently and conduct carefully when changing the passage state or restarting after changes.
